

Build Your Own Yurt

Supplies Needed:

1. Scissors
2. Glue or Tape
3. Crayons, markers, colored pencils, paint, glitter
(anything you'd like to make your yurt yours)

How to build your own yurt:

1. Color all pieces of the yurt (wall, roof, dome, landscape)
2. Cut out the wall, roof, dome, landscape pieces along the outside black lines
3. Wall: place glue on Tab B, overlap Tab A onto Tab B, press down, and let dry
4. Roof: place glue on Tab B, overlap Tab A onto Tab B, press down, and let dry
5. Dome: place glue on Tab B, overlap Tab A onto Tab B, press down, and let dry
6. Landscape: Fold along the dashed line
If you'd like, try making your own landscape objects. To do this, draw landscape objects (trees, plants, animals), draw a black outline around the outside of your objects with tabs under each item. Cut out and fold.
7. Assemble all parts: place the roof on top of the wall, place the dome on the top of the roof, stand landscape around your yurt. You can glue together all parts or keep them loose.
